

ALL-IN-ONE LIVE EVENT WORKFORCE PLATFORM

The composable, AI-Native event workforce platform

Teambridge's composable architecture is built for the complex, high-stakes world of event operations. From credentialing to last-minute shift coverage, every workflow can be tailored to match your venue's policies, processes, and staffing rhythms—all without writing a single line of code. With powerful automation and built-in AI, venues across the country are using Teambridge to fill shifts faster, retain their best crews, and ensure seamless fan experiences.

It's the only workforce management system that gives event operators a true edge on game day.

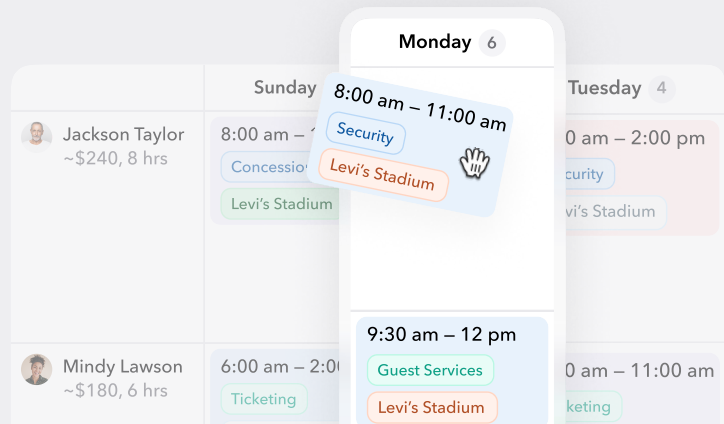

Make your schedules and timesheets work for you

Teambridge's composable platform lets you customize everything from the policies and logic that power your schedules, to geofencing for real-time staff location tracking, and more.

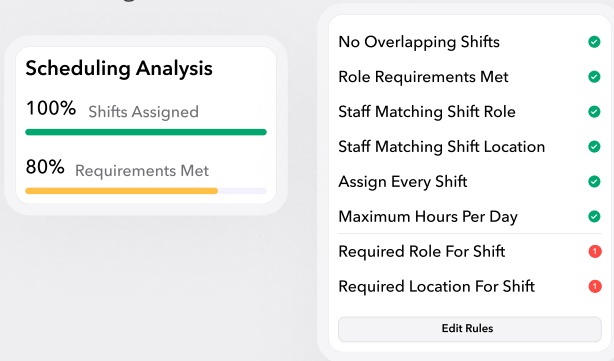

Fast-track event-day scheduling with a drag-and-drop builder

Customize every detail of every shift and build templates for fast bulk schedule creation.

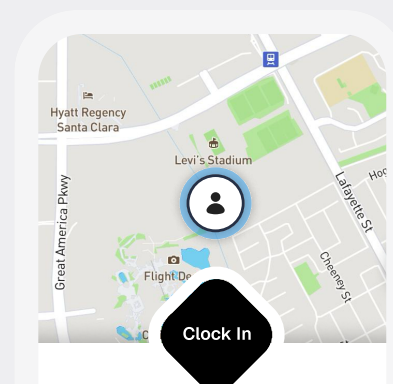

Set the rules that automatically govern your schedules

Set granular rules that govern your game day shifts, like setting specific requirements for security, concessions, or ticketing.

Mobile time tracking that gives everyone time back

Use mobile clock-in with geofencing to confirm staff are at the right gate, section, or booth, at the right time.

What else is in your scheduling & time tracking toolbox

Custom rules & policies

Custom pay rates

Geotracking & geofencing

Smart assignments

PTO & overtime

Time card approval portal

Put your manual processes on autopilot

Teambridge's no-code Automation Engine streamlines the manual, time-intensive workflows that bog down your venue's operations. With over 150 million manual processes automated, our customers save time, cut costs, and deliver smoother fan experiences—every game day.

How the no-code Automation Engine works

Choose a trigger

Pick any event in Teambridge, like event staff clocking in, or a shift being dropped.

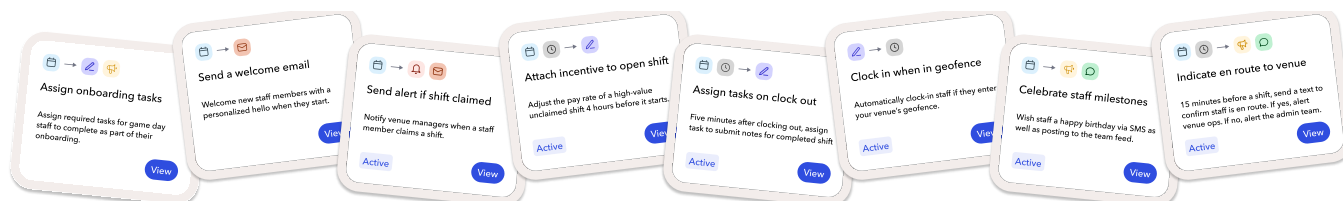

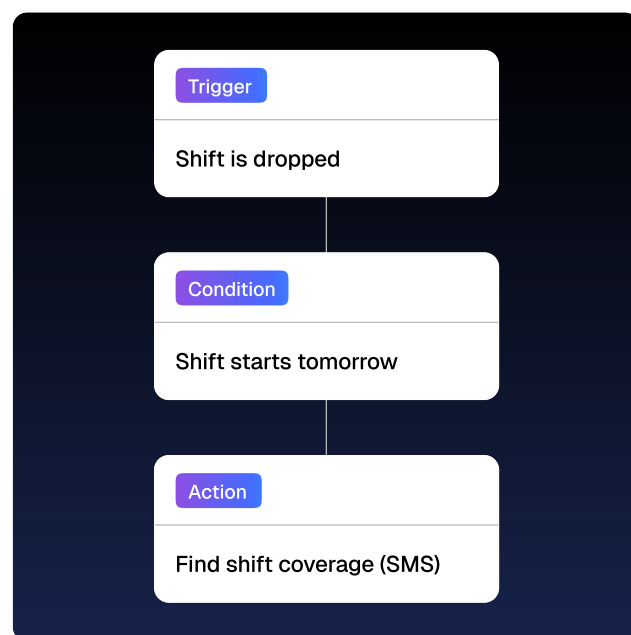

Add conditions

Specify when the automation is triggered with granular conditions like staff role or location.

Assign action(s)

Decide what should happen, like sending an email or SMS, or adjusting a pay rate.

Automations save time, money, and reduce business risk.

Automatically send broadcasts or DMs to staff based on any triggering event

Quickly fill coverage gaps with custom scheduling rules and automations

Use self-service onboarding to get hundreds of staff event-ready in hours

AI for the people who deliver incredible experiences

Scale faster, make smarter decisions, and drive impact where it matters most.

Meet your operational advantage

Teambridge AI is built to solve the challenges that come with managing a workforce at scale. It turns manual tasks and processes into automated workflows, and gives businesses a real operational edge.

Ponder

Always-on analyst & assistant for everything from financial trend analysis to shift creation and scheduling.

Specialists

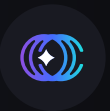

Source, recruit, and schedule with unmatched scale and speed by building your own no-code custom AI agents.

Policy Builder

Define rules like overtime limits or union requirements, and let Teambridge automatically enforce them.

Automation Engine

Orchestrate it with custom workflows that automatically trigger AI Specialists when the criteria you set is met.

Teambridge AI knows your business, works like your best teammates

Contextual

Built for your unique data structure, policies, and people.

Operational

Teambridge AI can autonomously complete work from end to end.

Composable

No code needed to deploy AI that actually helps reach your goals.

The workforce management platform that molds to the shape of your live events business

Teambridge gives even the largest venues everything they need to hire, schedule, and manage their workforces—fast. Start with essentials like last-minute shift fulfillment and mobile check-ins, then layer in more as you grow. With a composable, mobile-first platform, you can move faster, reduce no-shows, and deliver standout experiences to your fans every game day.

There's so much more to Teambridge...
